ICMTE 2014

International Conference of Manufacturing Technology Engineers

Sep. 30(Tue.) ~ Oct. 2(Thu.) 2014

Jeju KAL Hotel, Korea

Topics and Scope

- Advanced Machine tools and Tooling
- Precision and Ultra-Precision Machining
- Micro and Nano Machining
- Nonconventional Machining
- Green Manufacturing System
- CAD/CAM/CAE
- Numerical Control and HMI Technologies
- Machine Tool Vibration and System Control
- Robot and Process Automation
- IT-BT Convergence Manufacturing
- Ocean Plant Manufacturing Technologies
- Etc.

Korean Core-Research Lab. Remote Tour

- Exhibition of Core Laboratories in Korean Universities / Institutes for Global Research Cooperation.

International Forum and Panel Discussion

- Future Trends of Global Manufacturing Technologies

www.sjtu.edu.cn

www.ksmte.kr

KSMTE

Korean Society of Manufacturing Technology Engineers

October 2(Thu.) [Poster Session Ⅲ]
10:00~12:00

IT-BT Convergence Manufacturing

Chairman : Prof. Joosang Lee(Nambu Univ.)

A Condition-Based Real time Monitoring Systems for Precision equiopments with Ball-Screw via Vibration Signal
W. G. Lee, Y. H. Jeon, J. W. Lee(Ajou Univ), H. J. Lee(KITECH), M. G. Lee#(Ajou Univ)

Parametric study on the effect on the die shift according to the die-gap at wafer level packaging molding process
S. M. Yeon#, J. H. Park, S. H. Park, N. K. Lee(Korea Institute of Industrial Technology), J. H. Kim(Seoul NU), H. J. Lee(Korea Institute of Industrial Technology)

Removal Efficiency for Fine Fume from Steelworks by Two Types of Bag Filters
Y. J. Seo(Kumoh National Institute of Technology), J. H. Park#(KITECH)

Self-formation of porous hollow fiber for biological and environmental applications
H. J. Kim#, C. S. Jang, B. H. Kim, Y. H. Seo(Kangwon NU)

Nonconventional Machining

Chairman : Prof. Joosang Lee(Nambu Univ.)

A study on an electrode wear compensation method basedon the number of normal discharge and Uniform Wear Method in micro EDM
V. Q. Nguyen, T. H. Duong, T. A. Vo#, H. C. Kim(Inje Univ.)

Changing the pattern width according to the ratio of federate to spindle speed
D. S. Han#, K. Qui, T. J. Ko(Yeungnam Univ), J. K. Park(KIMM)

Characterization of indium tin oxide thin films grown by e-beam evaporation
S. W. Lee#(KIMM, Chungnam NU), J. H. Kim, Y. E. Yoo, J. S. Yoon (KIMM)

Controlled depth patterns in laser direct ablation using a zinc-coated layer
B. X. Cao#(Univ of Science and Technology, KIMM), Y.K. Cho, D. S. Shin, J. H. Noh, H. K. Sohn(KIMM)

Design of voltage source for electrostatic column array
S. J. Lim#(Korea Institute of Machinery & Material)

Fabrication of aluminum micro-lens cavity arrays using modified wet etching process of high purity aluminum for the durable micro-lens mold
W. K. Jang#, B. H. Kim, Y. H. Seo(Kangwon NU)

Fabrication of Piezo-Driven Micro-positioning 3-degree-of-freedom Stage using 3-dimensional printer
D. H. Lee#, N. G. Cho(Graduate school of Hanyang Univ.)

Scan device development for electron beam finishing instrument
S. J. Lim#, J. Y. Choi(KIMM)

Developments and applications of jet electrochemical machining
W. Ming#, Z. Guo, T. Sun(Guangdong University of Technology, China)

Electroforming mirochannel metal dies using simple multilayer photoresist moulds
W. S. Zheng#, Z. N. Guo, J. F. He, S. Z. Jiang, Y. J. Tang, Y. J. Zhang (Guangdong University of Technology, China)

Investigation on pulse electrochemical machining by coated electrode
W. Ming#, Z. Guo, Y. Tang, G. Wang, T. Sun, S. Jiang (Guangdong University of Technology, China)
