Education

Guangdong University of Technology, Mechanical Engineering (ESI TOP 1‰), *Ph.D.* 2016.09 - 2020.12

- **State Key Laboratory**: State Key Laboratory of Precision Electronic Manufacturing Technology and Equipment
- **PhD. Thesis**: Theoretical and experimental research on the surface microfabrication by mask electrolyte jet machining based on multi-physical model and machine learning model

Guangdong University of Technology, Mechanical Engineering (ESI TOP 1‰), *Master* 2013.09 - 2016.07

- **State Key Laboratory**: State Key Laboratory of Precision Electronic Manufacturing Technology and Equipment
- **Master Thesis**: Modeling and research of mask- Jet-ECM applied in surface micro texture

Hongkong Polytechnic University, Nanomanufacturing lab, *Summer school* 2013.07 - 2013.08

Dongguan City University, Mechanical Engineering and automation, *Bachelor* 2008.09 - 2012.07

Professional experience

KU Leuven, Research Associate 2024.03 - present

Joint researcher from *Manufacturing Processes and Systems (MaPS)*, Department of Mechanical Engineering and *Declarative Languages and Artificial Intelligence (DTAI)*, Department of Computer Science

Research field:

- AI-assisted workplan generation for 3D designs with CNC manufacturing processes
- Data-driven process parameter optimization for non-metallic additive manufacturing process
- Application of machine learning and AI technologies for (additive) manufacturing in-process monitoring and control

KU Leuven, Postdoc 2021.03 - 2024.03

Joint postdoc from *Manufacturing Processes and Systems (MaPS)*, Department of Mechanical Engineering and *Declarative Languages and Artificial Intelligence (DTAI)*, Department of Computer Science

Research field:

- Data-driven process parameter optimization for non-metallic additive manufacturing process
- Application of machine learning and AI technologies for (additive) manufacturing in-process monitoring and control
- Computer vision inspection of industrial products

KU Leuven, International scholar 2019.09 - 2020.09

[Award] Scholarship under the Outstanding Young Scientific Research Talents International Cultivation Project Fund of Department of Education of Guangdong Province.

Research field:

- Fabrication of micro-scale surface structures using non-traditional manufacturing process

Tokyo University of Agriculture and Technology, Visiting Scholar 2023.11

- Funding by SAKURA SCIENCE Exchange Program administrated by Japan Science and Technology Agency.

Institute of Science and Innovation in Mechanical Industry Eng., Portugal, Visiting Scholar 2018.01 - 2018.01

Urban Transport Systems Laboratory of EPFL, Switerland, Visiting Scholar 2017.07 - 2017.07

Research activities

- Fields of Reaserch:

- AI-assisted CAD-to-CAM workplan generation and optimization
- Multiphysical Modeling
- In-process Monitoring and Control (based on vision/acoustic data)
- Additive Manufacturing (LPBF/WAAM/FFF) and Subtractive Manufacturing (ECM/EDM)

- Funding

AutoCAM_SBO, Belgium **2024.10 - present**

- **Description** Strategic Basic Research: AI-assisted CAD-to-CAM optimization for Machining Processes
- **Total project budget** ~2.75M Euros
- **Responsibility** Propsal contributer, lead researcher Work plan generation based on the product specific preference and the environmental constrains by generative AI

MuSIC_SBO, Belgium **2022.10 - present**

- **Description** Strategic Basic Research: Multi Sensor fusion for In-process Control
- **Total project budget** ~3.5M Euros
- **Responsibility** Lead researcher Investigations on AI based defects inspection in Laser Powder Bed Fusion(LPBF) and wire arc additive manufacturing(WAAM) process

C3AF3, Belgium **2022.10 - present**

- **Description** KU Leuven Internal Funding: Adaptive Fused Filament Fabrication
- **Total project budget** ~220K Euros
- **Responsibility** Lead researcher Researches on Data-driven and physical driven process parameter optimization for filament printing process with thermal vision system

CTO Action, Belgium **2022.06 - 2022.12**

- **Description** Flanders make CTO Action 2022
- **Total project budget** ~95K Euros
- **Responsibility** Lead researcher Drafting the glossary for Belgium industrial 5.0 (Triple helix section).

ADAVI, Belgium **2021.03 - 2024.03**

- **Description** Flanders Make Interdisciplinary Collaborative Research project. Anomaly Detection by Active Visual Inspection
- **Responsibility** Researcher 3d measurement by single-eye fringe projection for industrial products.

National Natural Science Foundation of China, China **2016.09-2019.09**

- **Description** A new method and application investigation on micro surface fabrication by mask micro electrochemical discharge machining
- **Responsibility** Lead researcher A novel electrochemical machining process comprising scanning electrode + photolithography was investigated.

National Natural Science Foundation of China, China **2016.09-2019.09**

- **Description** Fundamental studies on precision electrochemical machining of thin-walled micro-grooved plates for difficult-to-machine materials
- **Responsibility** Lead researcher A novel Micro-Electrochemical Discharge Method for machining thin-Walled Structures was studied.

National Natural Science Foundation of China, China **2018.09-2019.09**

- **Description** Investigation on a new approach of manufacturing surface functional microstructures using magnetic powder electrode discharge.
- **Responsibility** Proposal drafter, Lead researcher A novel method of self-adaptive EDM for surface microstructure fabrication was developed.

- Academic Service

- **120+** review activities for **30+** academic journals.
- **Editor Board** of International Journal of Industrial and Manufacturing Systems Engineering
- Member of The American Society of Mechanical Engineers (ASME) since 2022
- Member of Institute of Electrical and Electronics Engineers (IEEE) since 2022
- Member of Flanders Make since 2021
- Member of Guangdong Mechanical Engineering Society since 2021

[9] H. Luo, S. Zhan, **M. Wu**, Z. Guo, G. Liu, Y. Zhang, and H. Peng, *A kind of device and electrochemical machining method for the profound and subtle groove of Electrolyzed Processing planar array*, (2019). [Online]. Available: https://patents.google.com/patent/CN106862683B/en?oq=CN106862683B.

[10] **M. Wu**, Z. Guo, J. He, and X. Chen, *A kind of device and method of template electro-stream machining metal surface micro-structure*, (2018). [Online]. Available: https://patents.google.com/patent/CN108115233A/en?oq=CN201711385329.

[11] **M. Wu**, Z. Guo, J. He, and X. Chen, *A kind of mask electro-stream machining device*, (2018). [Online]. Available: https://patents.google.com/patent/CN207695794U/en?oq=CN201721794526.

[12] **M. Wu**, Z. Guo, J. He, and X. Chen, *A kind of molding micro-mould processing unit (plant) of jet flow electroforming*, (2018). [Online]. Available: https://patents.google.com/patent/CN207713840U/en?oq=CN207713840U.

[13] **M. Wu**, Z. Guo, J. He, and X. Chen, *Micro-electrolysis discharge machining working solution and micro-electrolysis discharge machining method*, (2018). [Online]. Available: https://patents.google.com/patent/CN108149282A/en?oq=CN108149282A.

- Others

1. Web application of real-time ECM processing profile predictor: mingwucn.github.io/SmartECM/
2. Desktop application for fringe projection tailored for high-reflectivity surfaces, developed under the intellectual property rights of KU Leuven.
3. Founder of Guangzhou Nansha Weiming Digital Service Center, China since 2020

Teaching

- **Co-Supervisor** for KU Leuven PhD Thesis 2025: AI-assisted CAD-to-CAM optimization for Machining Processes
- **Assessor** for KU Leuven Master Thesis 2025: Enhancing Quality Prediction in Injection Molding: Integrating Geometrical Part Information using Neural Network Models
- **Daily Supervisor** for KU Leuven Master Thesis 2024: Co-pilot for function-driven product design: automated generation of 3D designs tailored to specific functional requirements
- **Guest Lecture** for *AI in Manufacturing* in KU Leuven, December 2024.
- **Volunteer lecture** of ICARE Guizhou for Online Course Non-Profit program 2021 (May-June)
